

**Camassa**  
**in action**  
**for the**  
**environment.**

Camassambiente is an engineering and contracting company working in a wide range of task areas on environmental emergency management and land improvements, in various different forms of participation, such as General Contracting, Business Partnership, and Company Management.

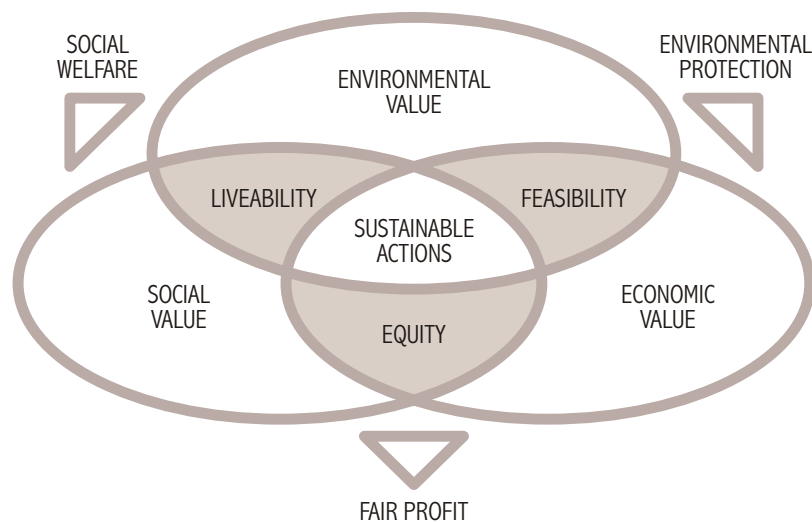

Our business is  
action. Action for  
the environment.

“ Affirm  
**action**

The Camassambiente management team have been working for over twenty years on a variety of sustainable activities, leading to a turnover of over 300 million euros, and employing over 5,000 workers, many from socially-disadvantaged backgrounds; this active labour policy, together with positive projects in the social and environmental arena, has earned Camassambiente recognition as a “socially responsible” company (Ethical Certification SA: 8000 n. SA - 390).

A history of creating value.

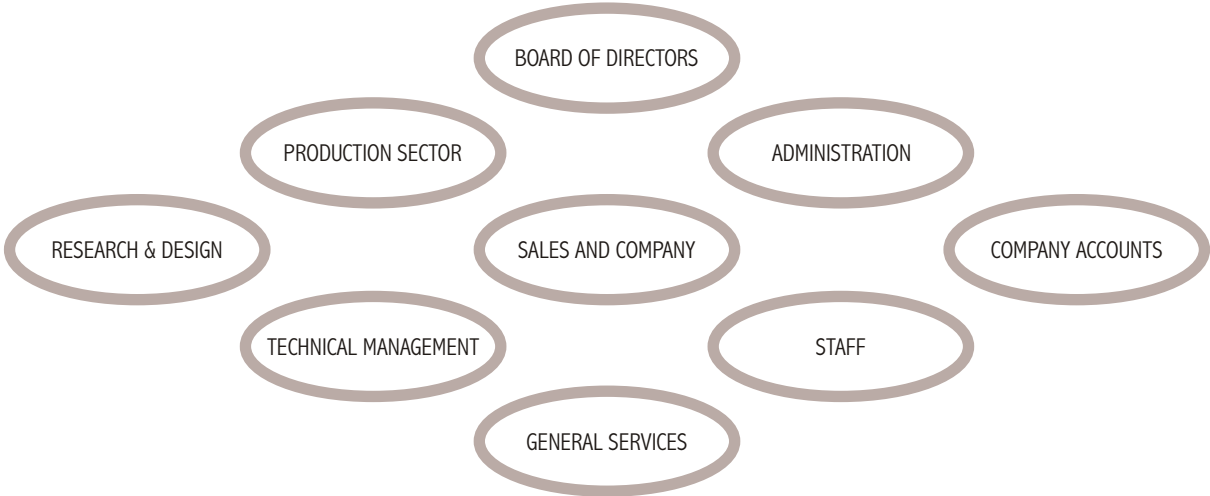

# ! Value action

The management teams stands out not only in the multidisciplinary nature of its skills base, which can count on staff from a technical and scientific background (engineering, architecture, environmental sciences, agronomy and forestry, biology and chemistry), and from the socio-economic sector (economics, law, sociology), but especially due to the competency and experience of the managers: with an average age of under 40, they play key roles in the analysis of critical environmental issues, in researching and planning rehabilitation and/or improvements, as well as the governance of restoration projects.

The environment, a multi-dimensional perspective.  
The team, multi-disciplinary skills.

# × Inter action

The company's organisational system complies to the International Organization for Standardization for Quality Management - ISO 9001 (System certification no. 15983/07/S), for Environmental Management - ISO 14001 (System certification no. EMS- 2405/S), for Security Management - OHSAS 18001 (System certification no. OHS-299) and for Social Responsibility - SA 8000 (System certification n. SA-390). Adopting these standards has involved complicated integration with the large and complex technical regulatory framework that oversees the company's different activities, but also confirms Camassambiente's managerial excellence over competitors in its core activities:

One System,  
many qualities.

# \* Certifico action

- \* from monitoring to environmental sanitation
- \* from cleaning up polluted sites to waste management
- \* from building renovations to bio-architecture
- \* from industrial safety to energy streamlining

We carry out these various tasks, backed up by specific training and authorisations:

- rehabilitation of real estate, adaptation of technological and special equipment (S.O.A. certification - category OG 1 and certification according to Italian law 46/90 - categories a, b, c, d, e, f, g)
